**Description**

In the range of 100% synthetic high pressure oils, HP1300 is the most viscous and last in the series. In addition to their pressure resistance properties these HP oils are extremely stable and have good lubricity and adhesion. The friction coefficient is insensitive to wet conditions and the oil is suitable for all types of materials.

**Technical features (indicative values)**

<table>
<thead>
<tr>
<th>Property</th>

**Uncutuousness / Lubricity**

**Viscosity / Texture**

**Ageing resistance / Stability**

**Adhesion / Grip**

**Compatibility**

- Metals and polymers

**Application**

- High pressure

**Shelf life**

- 6 years

**Temperature range**

- -25 °C to +100 °C

**Application fields**

- High pressure oil to be used for:
  - Precision micromechanics (watch, timer, measuring devices, tools, ...)
  - Instrumentation and counters (automotive, aeronautic, naval, ...)
  - Micro motors and stepper motors
  - General mechanics (office equipment, fans, ...)
  - Ball bearings, parts of mechanisms
  - Lubrication of slow mobiles submitted to significant pressure and torque (gearing, certain wheels, ...)

**Radar chart**

- Viscosity index
- Superficial tension
- Pour point
- High pressure resistance
- Wear resistance
- Friction reduction

**Storage**

We advise keeping Moebius products in their original packaging in a clean and dry place, protected from light, ideally at a temperature of 15 to 26 °C.

After opening we recommend keeping the products for a maximum of 12 months.
